**L N G**

**LIQUEFIED "NATURAL" GAS**

Liberty Natural Gas, LLC, proposes to build Port Ambrose, an offshore facility for liquefied natural gas (LNG) tankers, just a few miles off our beaches. Port Ambrose could be used to import or export natural gas. LNG is natural gas that is super-chilled to  $-260^{\circ}$  to liquefy it for transportation. It is highly flammable and unsafe.

### **Top 5 reasons to oppose LNG-Port Ambrose**

1. LNG tankers and facilities pose serious security risks vulnerable to terrorism. Port Ambrose is just miles from NY/NJ Harbor, JFK Airport, and located between channels used for commerce including chemical oil tankers.
2. LNG is a disaster for our climate and steers us away from efficiency, conservation, and renewable energy.
3. Liberty Natural Gas is a secretive corporation of nameless backers based in the Cayman Islands that refuses to disclose who they are and their financial investors.
4. Port Ambrose will likely become an export facility. Once approved for import it can be flipped to export without further public input, worsening the industrialization of our oceans, affecting fishing and climate change, like we saw with Superstorm Sandy.
5. LNG Port Ambrose will create only six (6) long-term jobs; A real green energy future, including energy conservation and renewables, will create thousands of high-paying permanent jobs.

*Call Governor Cuomo* **Tell him to “VETO the LNG Port”**
